Includes Track Option

Manual 2: Parts Reference

DuraTech Industries International Inc. (DuraTech Industries) has made every effort to assure that this manual completely and accurately describes the operation and maintenance of the 6010TM Tub Grinder as of the date of publication. DuraTech Industries reserves the right to make updates to the machine from time to time. Even in the event of such updates, you should still find this manual to be appropriate for the safe operation and maintenance of your unit.

This manual, as well as materials provided by component suppliers to DuraTech Industries are all considered to be part of the information package. Every operator is required to read and understand these manuals, and they should be located within easy access for periodic review.

**** This power unit system is only to be used to lower the cab in emergency situations. ****

1. Assemble bracket (4705456) to existing bracket as shown in figure 1 with existing bolts, washers and nuts.
2. Assemble power unit (4000267) to bracket (4705456) as show in figure 1 with (2) 3/8" x 1" bolts and 3/8" lock washers.

FIGURE 1

FIGURE 2

3. Assemble (2) fittings (3800757) into power unit ports and connect (2) hydraulic hoses (3701401) to fittings 3800757 as shown.

4. Assemble (2) tee fittings (3800966) in the locations shown in figure 3. Assemble the hydraulic hose from the top port on the power unit (see figure 2) to tee fitting A (see figure 3). Then assemble the hydraulic hose from the bottom port on the power unit (see figure 2) to tee fitting B (see figure 3).
5. Install circuit breaker near starter. Use hole pattern in breaker for guide for drilling holes. Bolt in place. If 60 amp circuit breaker is in use for a hydraulic hammer rod puller, attach to this auxiliary post instead.
6. Connect wires as shown in drawing.
7. Plug switch pendant into short harness at pump, route cable and switch into loader cab.
8. Filling the reservoir on the power unit only use one quart of oil.
9. Test run cab up and down to verify functions are correct. If switch label is wrong, open switch up and change output wires so operation matches the switch labels.
10. When this is used to lower the cab, oil from the cylinder goes into the reservoir. If done twice in a row, reservoir will be overfull and oil will dump out of reservoir. To maintain proper oil level, raise cab with this power unit after any repairs have been made to the grinder, and go back to normal operation.

The following items are to be checked as they are explained to the owner / operator at the time of delivery

- ☐ Explain the delivery packet and present the operators manual(s) to the owner / operator.
- ☐ Review and inspect the machine safety signs (decals) and the operator's manual.
- ☐ Advise the owner that the dealer is the source to obtain operator training, and information regarding the correct application of the machine to the job, as well as service and warranty information.
- ☐ Explain the capabilities and restrictions of the machine as it applies to the owner's application as defined in the operator's manual.
- ☐ Explain the operation of the controls and start up and shut down procedures of the engine and power transmission components of the machine.
- ☐ Explain rated lift or carrying capacity and loading and unloading procedures of the machine to maintain safety and stability of the machine.
- ☐ Explain proper folding, unfolding, and transporting procedures to the owner / operator.
- ☐ Explain recommended fueling procedures on engine equipped machines.
- ☐ Explain proper loading and unloading of materials from the tub or grinding chamber of the machine.
- ☐ Objects thrown by shredding or spinning rotors may represent a hazard to personnel and property in the area. Minimize risks by planning and by keeping personnel and property clear of hazard area.
- ☐ Explain the availability and use of the tub cover to further reduce risks of thrown objects.
- ☐ Review maintenance and lubrication procedures with the operator / maintenance person as defined in the operators manual.
- ☐ Advise never to use the machine in an environment with explosive or flammable materials present.
- ☐ Explain warranty policy and limitations to the owner / operator.

Warning

Misuse of the machine or modification or removal of the guards, safety devices, or control interlocks can cause injury or death.

The above delivery information has been explained to me. I understand the operation and maintenance of this machine. I also acknowledge the warranty conditions and limitations as outlined.
